

To Whom It May Concern:

I was concerned to learn that you may be replacing stations like KLOVE with Low Power FM stations. The loss of KLOVE to me and our community would be great. It provides positive and family safe programming that improves the quality of life for each person who chooses to listen to it. I like that it is available across the country because I can listen to it when I travel and feel a little closer to home.

If KLOVE was replaced by another local station, our community would lose a very positive influence for good and a very family safe station. Additionally KLOVE runs information about local events that benefit the community free of charge enabling them to be better attended. This benefits our whole community.

I believe KLOVE is definitely in the public interest because it provides positive, upbeat music, radio hosts and news that keeps people in a positive frame of mind and able to perform better in their daily tasks. If it is replaced by another station, it would be a huge loss to me personally and others in my community.

Sincerely,

Lisa C. Medanic
